

# **World's 1<sup>st</sup> commercial solar-powered pavement made of recycled tires**

**Transform sidewalks, bike paths and  
pavements into energy sources**

# Road infrastructure, revolutionized.

**Embraced by world-leading pioneers.** amazon has ordered 54 square meters for its logistics center. Currently, the system is only available to leading companies.

## **Circular economy.**

Made from 92% recycled materials.  
50sqm of the solar pavement contains  
200 reused tires.

## **Modular.**

An off-grid solution for last mile commute energy challenges, offering multiple applications - powering charging stations, road lights, safety and communication systems, etc.

## **Highly durable.**

Withstanding large loads, various types of vehicles, and other road hazards.

## **Safe for urban use.**

Special anti-slippery coating and low voltage tiles.

# Rethink Energy.

Founded in 2014, Apollo is an innovative energy company that has created a unique technology for manufacturing flexible, lightweight, durable and high-efficiency energy films that transform surfaces into an energy source.

The company designs, manufactures and installs solar systems in a range of fields, including automotive, water-floating solar systems, truck and bus fleets, aerial and others, collaborating closely with large international companies.
