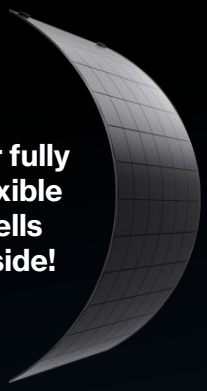
APOLLO

Hybrid Energy Box

Immediate, reliable power



Our fully flexible cells inside!

Full hybrid system
Multi-source kit

Fast & easy to deploy
Up to 30 minutes installation

Durable and reliable
Patented cell technology and cutting-edge electric system

Ultra lightweight panels
only 7.6 Kg / 16.75 lbs

APOLLO

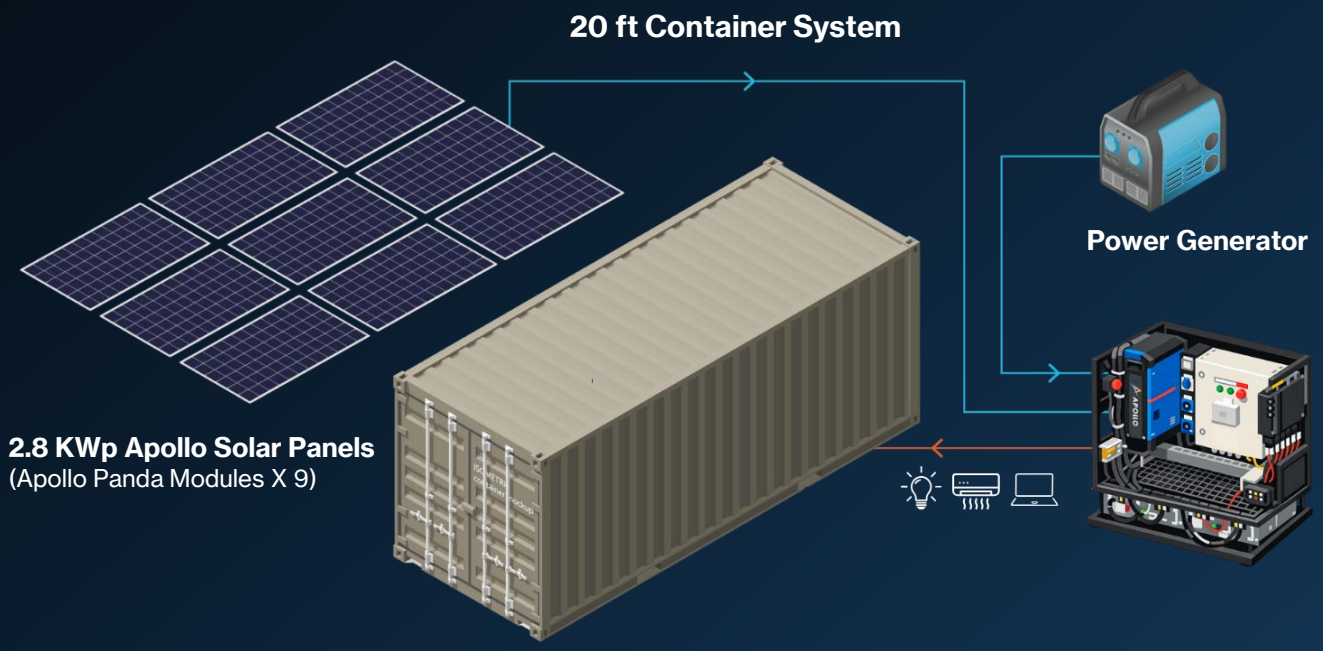
Hybrid Energy Box

Immediate, reliable power

Hybrid Energy Box delivers immediate energy availability through a hybrid, multi-source system designed for reliable off-grid operation. It significantly reduces fuel consumption and generator engine hours, lowering operating costs while remaining easy to deploy, operate, and relocate, even by unskilled personnel. With a modular, fast-install design and an easily deployable solar system, it provides a field-ready energy solution built for efficiency and operational resilience.

System Electrical Information:

Solar and electrical components can be adjusted to any container size



Each Module:

Maximum Power (Pmax)	310W
Maximum Power Voltage (vmp)	37.6
Maximum Power Current (Imp)	8.25A Imp
Open Circuit Voltage (voc)	47.5 ±5% V
System Open Circuit Voltage (voc)	47.5 ±5% V

Hybrid Converter Box:

- 20KW Batteries
- MultiPlus Converter
- Fully integrated electrical cabinet with data monitoring screen
- Service outlets
